

The logo for in10sity, featuring the text 'in10sity' in a white, lowercase, sans-serif font with a trademark symbol (TM) to the right. The logo is centered within a dark blue horizontal band that is part of a larger vertical blue bar on the left side of the page.

in10sity™

Design and Sitemap Approval

Date: 05.01.2015

Client: Cumberland Family Medical Center –
Glasgow Pediatrics

Site: <http://www.glasgowpediatrics.com/>

About This Form

This approval form serves as your written final approval of the website design, color palette, website structure, font styles, menu system, and page layouts. This form is also your approval for the sitemap that will be implemented for the launch of your website. It is **vital** that the sitemap approved in this document is accurate and corresponds with the approved design.

Carefully review the design gallery, site domains, sitemap, and technical specifications for your email marketing template. Please sign this form and return it to your account manager via email. Please note that once this form is signed by client, any changes to the design or sitemap could cause client to incur additional fees and/or impact production schedule.

Design Gallery Approval

The approved design gallery will be used to develop the HTML (front-end code) for your website page layouts. In10sity will take the approved design literally during this process, so it is important that you are happy with the overall design, structure, color palette, font styles, and positioning of design elements and user interface.

Please Review Your Gallery

<http://gallery.in10sity.net/glasgowph6>

User name: gallery

Password: 1234qwer!

Sitemap Approval

Your sitemap is just as important as your site design. The sitemap will serve as the guide for in10sity's content team as well. In10sity will use the approved sitemap to track progress when migrating content and images, so it is imperative that the content you provide is organized in agreement with the approved sitemap.

Your sitemap is attached as Appendix A at the end of this document.

Technical Specifications

This section of the document explains the technical details for the client website. It will establish clear expectations for HTML/Web Production during the development phase of this project.

Site Resolution

This is the standard resolution (width) that will be displayed on desktop and laptop displays

Pixels visible width

Responsive:

Yes

No

Responsive websites use CSS3 and Media Queries to develop resolution break points which allow your site to display at specific resolutions for popular tablets and smartphones. **Please note that in some cases responsive sites may not display correctly at resolutions that are between resolution break points.**

Platform & Browser Support

Hardware

PC

ANDROID Tablet/Phone (if responsive)

APPLE MACINTOSH

iPhone/iPad (if responsive)

Browser Compatibility

The following major web browsers are considered as supported by in10sity design standards. These browsers are used by most people while they browse the internet. Due to the support of core web standards, the most recent versions of most browsers have made strides to produce similar display output. However, some browsers, particularly older versions of Internet Explorer, will still display certain HTML and Dynamic elements differently.

Internet Explorer 8 (limited support on responsive sites)

Internet Explorer 9

Internet Explorer 10

Internet Explorer 11

Mozilla Firefox

Google Chrome

Safari

Android Browser (if responsive)

Site Domains

Your website domains are typed into web browsers to access your website. It is important to define your primary domain for visitor data tracking purposes. Your secondary domain(s) will redirect to your primary domain. Most clients will have at least two domains: <http://yoursite.com> and <http://www.yoursite.com>. In most cases, the www. version is the primary domain

Your Domain(s)

Primary Domain: <http://www.glasgowpedes.com/>

Secondary Domain(s): <http://glasgowpedes.com/>

Multiple Sites?

This checkbox is for in10sity reference only. A client with multiple sites is typically grouped together in our hosting environment so that the server and content management system can be configured appropriately.

This client will have multiple sites with in10sity:

Yes

No

Final Signoff

By signing below, client agrees that:

1. The site design gallery is approved and meets the currently outlined business needs and objectives.
2. The sitemap in Appendix A is accurate and that submitted content will correspond to approved sitemap correctly.
3. Any changes to the design or sitemap will cause client to incur additional fees.
4. Any applicable invoices, per website agreement, are due at this time.

CLIENT SIGNATURE

DATE

5/1/15

- per approved design - see attached

Thank you! With your signature, we will now move into the development phase of your website project!
